

MESSAGE

I would like to congratulate and commend the efforts of All India Induction Furnace Association (AIIFA) for organizing the conference on **'Strengthening Green Steel Production: Building Pillars for New India'**, and bringing all the think tanks and industry experts together at a common forum.

India as an economy has significant growth potential. If the ambitious National Steel Policy is taken as an indicator of potential, the targeted steel production of 300 Million Tonnes by 2030 offers major opportunities for huge fresh investments coming in the sector in the next 10 years, to create greenfield capacities of around 175 Million Tonnes. We need to create a more globally competitive environment for 'Making In India'. We as an Industry have the potential, and the determination for efficiently 'Making In India' to 'Make In India' a success story.

I extend my best wishes to the organizers for a successful and insightful deliberation on the issues and opportunities for the sector.

Place : New Delhi
Date : 22.11.2017

Naveen Jindal
Chairman
Jindal Steel & Power Limited
