

MESSAGE

It gives me immense pleasure to note that All India Induction Furnace Association (AIIFA) is organizing its 31st National level Conference on **“Strengthening Green Steel Production: Building Pillars for New India”** scheduled on 24th November, 2017 at Hotel Le-Meridien, New Delhi.

As I understand, AIIFA is one of the premier industry associations of the country, serving the secondary steel sector and has been doing a commendable job since last 30 years in representing the interests of its members. I hope this upcoming 31st National Conference on strengthening green steel production will surely benefit its members and I wish AIIFA a grand success of this event.

Warm regards,

Sanjay Mehta

President – Metal Recycling Association of India
