

MESSAGE

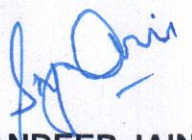

I convey my sincere greetings to the members of the All India Induction Furnaces Association on the occasion of AIIFA's 31st National Conference on "**Strengthening Green Steel Production: Building Pillars for New India**" scheduled on 24th November, 2017 at Hotel Le-Meridien, New Delhi.

The theme of the seminar based on "Green Steel Production" in present day scenario is of utmost importance to reduce emission and save our environment. We have recently faced alarming pollution levels in New Delhi and adjoining states so much so that National Green Tribunal ordered closure of industries using petcoke and furnace oil in NCR. Besides pollution Green Steel Production also helps in saving of our natural resources like iron ore, coal, water etc. and also generates less solid waste.

I hope that deliberations in this seminar will be very informative and eye opener to all the stake holders particularly induction furnace and re-rolling mill industry.

AIIFA on its part is doing whatever is best for secondary steel industry by holding technical seminars / lectures / interacting with various ministries as well as providing members with useful information and technical papers through its Induction Furnace Newsletter.

I welcome one and all to 31st National Conference of AIIFA.

SANDEEP JAIN
(PRESIDENT)
